Next Day Market Prediction

According to the Relative Strength Index (RSI), it exists on the line 30, namely, the market is dominated by the buyers (Bulls) who have beaten the sellers (bears) which caused the rise in the market, on the other hand, the Aroon up exists under the line 100 and Money Flow Index declined under the line 50, which is considered a bad signal. Williams's %R has the same point of view, because it exists below the line 30 which indicates a bad sign and it means that there is extremely extensive aggressive selling pattern.

Therefore the market is viewed to open higher than its closing index reaching 2322, accordingly; gradually it will rise to the level of 2328 ending with a closing index of 2323-2327
